ACADEMIC PROJECT

E-Learning Mobile Application – LearnScape.

- **Duration:** Dec. 2023 – April. 2024
- **Description:** Developed an e-learning mobile application designed to teach programming languages, including Java, C#, Python, and JavaScript. The app features user authentication (login and signup pages), quizzes, a to-do list, note-keeping, settings page, feedback and review options, social media engagement, password recovery, status updates, profile pictures, and more.
- **Technologies/Skills Used:** Java, XML, Firebase Real-time Database, Firebase Storage (Storing profile picture), JSON (for learning content, quizzes), Firebase Authentication (for user authentication, password recovery).
- **Achievements/Results:** Successfully integrated multiple programming language tutorials and interactive features to enhance user learning experience and engagement.

Android Chat application – My Chat

- **Duration:** May. 2023 – June. 2023
- **Description:** Developed a real-time chat application for mobile devices, facilitating instant messaging and communication between users. The app includes features such as one-on-one chat, user authentication (login and signup pages), settings page, status updates, profile pictures, and message encryption for enhanced security.
- **Technologies/Skills Used:** Java, XML, Firebase Real-time Database, Firebase Authentication (for user authentication). Firebase Storage (for Storing profile picture).
- **Achievements/Results:** Successfully implemented a reliable and scalable chat platform with seamless user experience, enabling users to connect and communicate effortlessly across various devices and networks.
